

USER REPORT

WNGN

Argyle, NY

**Brian A. Larson, President
Northeast Gospel Broadcasting Inc.**

**MODEL:
PSIFM-3-DA**

TECHNICAL SPECIFICATIONS

Frequency / Channel	91.9 MHz
Power Rating	9 kW
ERP	2 kW
Service	Analog
Mount Position	Side
Polarization	Circular
Directional	Yes
Radomes	N/A
Deicers	Yes

“I got my first FCC license in 1969. Over the last 35+ years I've used almost every antenna brand known to man.

I've loved PSI. The key is their president Doug Ross. Doug asks the

questions that make the difference. Where do you want the signal? Is this community a priority? Do you want beam tilt here or there?

We had a very difficult directional 3 bay FM with 2.2 kW to 270° and 240 watts to the other 90°. We had done another directional antenna by the best antenna manufacturer you could get, (according to all the experts). It cost us \$20,000 and sounded terrible and they wouldn't fix it.

For the above project we used PSI. It sounded great, and cost about \$12,000. We've since used PSI for three television stations and loved the results. Great coverage, great price! Thanks PSI”
